“Your search begins by **removing the water** with Fishers Side Scan Sonars”

Side Scan System

From \$20,995

**Tablet mounted in control
box cover available**

Side scan sonars are one of the most effective tools for underwater searches because they create a detailed picture of what's on the bottom.” The resultant display “removes the water” giving a clear image of the bottom.

Fishers SSS-100K side scan lets you search large areas quickly, the 600K and 1200K find even the small soft targets, and the dual frequency combines the best features of high and low frequencies.

The image is displayed on a PC or tablet showing a detailed high resolution picture of the bottom. An optional mapping window shows the boat's path and the size of the scanned area.
