***This Patent is  
For Sale***

The **PATENTED DYE DRY DOCK** design is a brand new invention for marine repairs that utilizes a modular floating system. This original concept for boat repair has features that have never been built anywhere in the world. It is a totally new concept utilizing "off the shelf" parts and machinery. **Bottom line:** This exciting dry dock system reduces building costs by over 50 percent, saves time, is inexpensive to operate and meets all DEQ regulations.

***Never been offered to the marketplace*** - Owner of this patent is interested in selling patent rights under a franchise agreement with people or person who wants to form a marketing company using existing patents, presently United States, European, Norwegian patents.

***This dry dock is pure - no water or air pollution*** - totally enclosed work area, work in all weather, day or night. It literally solves all E.P.A. and DEQ problems. Can be shipped on conventional trucks, installed on any waterway, portable, never rusts inside or outside. This dry dock has no negative features. This dry dock can be built to dry dock any size boat using this patented system - no limitation. ***Get in on this one time opportunity.*** Take advantage of it. We have researched the potential market - we have customers standing by. We will teach your personnel in marketing and shipping. We have full working prints and specifications. Pictures are nice but can't show our creative, innovative weight offsetting system. Call me, you will be amazed - never used in any other dry dock system. This product will change the world of boat repair. This dry dock can be installed on any waterway on the planet.
