

No Propellers

or fiberglassing Finally a Thruster System invented for BARGES and Shallow draft boats!

No large tunnels

Jet Thrusters are powered by an electric or hydraulic motor. The motor drives a jet pump that sucks water through an opening in the bottom of the boat and forces water at high volume via hoses. All model available in:

Bow only (single) Stern only (single)

No Noise

Bow and Stern (combi)

JT-70 (154 Thrust lbs) 24V JT-90 (198 Thrust lbs) 24V AC & Hydraulic Models Available
